AGM and EFB Batteries.

Since ACDelco invented the Sealed Maintenance Free battery, we have been at the forefront of new technology.

The new range of ACDelco AGM and EFB batteries feature key new technologies to meet the demanding requirements of modern vehicles with Stop/Start technology.

With a global focus on clean air and green technology, vehicle manufacturers are producing, designing and selling more and more models with Stop/Start fuel saving features. By 2015 it is estimated that 70% of vehicles made and sold in the European Union will feature this technology.

With the ability to handle a greater depth of discharge, AGM and EFB batteries are also the right choice for high demand applications such as taxi's, couriers and off-road vehicles.

EFB - Enhanced Flooded Battery

Evolved from the proven Sealed Maintenance Free range, our new EFB batteries are designed and manufactured to perform under the toughest conditions.

- Ultra high density plate material for high corrosion resistance
- Increased charge acceptance
- High depth of discharge lifecycle
- Wrought expanded grids with higher Sn (Tin) content
- Ideally suited to active management charging systems, high demand applications.

AGM - Absorbed Glass Mat

Designed specially to handle the high demands placed on starting batteries by advanced vehicle systems.

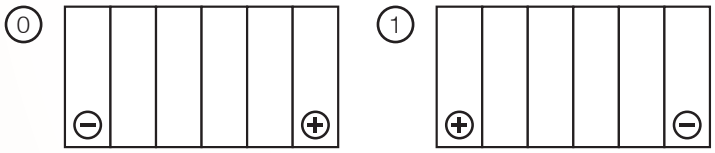

- High compression fleece separator
- Over double the cycle life compared with regular lead acid batteries
- Maintenance free - completely leak and spill proof
- Advanced construction - complex polypropylene case, high precision cold formed battery terminals, six safety valves
- High depth of discharge lifecycle
- Greater resistance to vibration
